SUMMARY

Motivated Computer Science (Data Science) student with experience in Python, machine learning, and data analysis. Skilled in data preprocessing, exploratory data analysis, and building predictive models using libraries such as Pandas, NumPy, and Scikit-learn. Passionate about leveraging data to solve real-world problems and improve decision-making.

SKILLS

- Data analysis
- SQL
- Python
- Java
- C

PROJECTS

BENGALURU HOUSE PRICE PREDICTION

Developed a machine learning model to predict real estate prices using XGBoost regression. Performed data preprocessing, outlier handling, feature engineering, and model tuning to improve prediction accuracy. Visualized results using Python, Pandas, Matplotlib, and Scikit-learn.

SENSOR-BASED OBJECT FOLLOWING ROBOT

Built a robot capable of detecting and following objects using sensor input and control logic. Enabled autonomous movement based on object position and distance for responsive navigation.

EDUCATION

Computer Science Engineering (Data Science)

New Horizon College of Engineering

Bengaluru, Expected in 2028

CGPA: 9.58

CERTIFICATIONS & LICENSES

The Joy of Computing Using Python – NPTEL (Currently Pursuing)

IITB Certification – GitHub

LANGUAGES

- English
- Kannada
